Safety Precautions

- Do not look at the sun or a bright light source through the lens or camera. Doing so could result in loss of vision. Looking at the sun directly through the lens is especially hazardous.
- Whether it is attached to the camera or not, do not leave the lens under the sun without the lens cap attached. This is to prevent the lens from concentrating the sun's rays, which could cause a fire.

Handling Cautions

- If the lens is taken from a cold environment into a warm one, condensation may develop on the lens surface and internal parts. To prevent condensation in this case, first put the lens into an airtight plastic bag before taking it from a cold to a warm environment. Then take out the lens after it has warmed gradually. Do not do this when taking the lens from a warm environment into a cold one.
- Do not leave the lens in excessive heat such as in a car in direct sunlight. High temperatures can cause the lens to malfunction.

Tak fordi du har købt et Canon-produkt.

Denne vejledning giver dig nogle grundlæggende tips til anvendelsen af Canon EF-objektivet. Sørg for at læse denne vejledning, så du kan anvende objektivet korrekt og sikert.

For yderligere oplysninger om anvendelsen af det produkt du har købt, skal du se den brugervejledning (PDF-format), som ligger på den medfølgende CD-ROM.

Anvendelse af CD-ROM "EF Lens Brugsvejledning"

1. Aset CD-ROM EF Lens Brugsvejledning i din PC'er.
- △ Anbring aldrig CD-ROM i et drev, som ikke er beregnet til CD-ROM. Hvis du sætter en CD-ROM i en CD-afspiller og forsøger at afspille den, kan du komme til at beskadige dine højtalere. Den høje støj kan ligelænge skade dine ører, hvis du ikke eksempligt anvender høretелефoner eller øreprotektor.
2. Vælg den fil, hvor CD-ROM er placeret.
3. Vælg en filen "START.pdf".
- ◆ Du skal have installeret Adobe Reader 6.0 eller derover på din computer.
4. På sproget menuen klikker man på det ønskede sprog.
5. På menuen for valg af objektiv, klikker man på navnet på dit objektiv for at åbne for brugervejledningen til objektivet.

Sikkerhedsregler

- Afstår fra kluge på solen eller er sterkt lykkelige i objektivet eller kameramodellen. Detta kan medføre et tab af synsevnen. Det er især skadeligt at kluge på solen direkte igennem objektivet.
- **Uanset om objektivet er monteret på kameraet eller ej, bør du ikke efterlade objektivet i solen uden at objektivdækset er sat på.** Detta er for at forhindre at objektivet koncentrerer solens stråler, hvilket eventuelt kan forårsage at der opstår en ildebrand.

Forholdsregler ved håndtering

- Hvis objektivet bringes fra et kaldt miljø til et varmt miljø, kan der dannes kondens på objektivets overflade eller indre dele. For i et sådant tilfælde at forhindre dannelsen af kondens skal du først opbevare objektivet ind i en lufttæt plastikpose, inden du bringer det fra et kaldt til et varmt miljø. Du kan derefter tage objektivet ud af posen, når det efterhanden er varmet op. Du skal gøre det samme, når du bringer objektivet fra et varmt miljø til et kaldt miljø.
- Efterlad ikke objektivet i ekstrem varme, som f.eks. i en bil i direkte sollys. **Høje temperaturer kan forårsage funktionsfejl på objektivet.**

1. Montering af objektivet på kameraet

Ret indeks på objektivfatningen (hvidt "□" eller rødt "●") ind efter monteringsindeks på kameraet, angivet med den samme farve, og drej objektivet med uret indtil det klikker. (Fig. ①)

- Når du har monteret objektivet, skal du placere objektivet med den bagved del vendende opad for at forhindre at objektivets overflade og elektriske kontakter bliver ridset. (Fig. ②)
- Hvis kontakterne bliver snudsede, risiderede, eller der kommer fingeratryk på dem, kan det medføre korrosion eller defekte forbindelser. Kameraet og objektivet vil muligvis ikke kunne fungere optimalt.
- Hvis kontakterne bliver snudsede, eller der kommer fingeratryk på dem, kan du tørre dem af med et blødt stykke stof.
- Hvis du använder objektivet, skal du beskytte det med en støvhætte og deretter dreje i vorets retning. (Fig. ③) Du skal følge proceduren ovenfor i modsat rækkefølge for at tage den af.

2. Angivelse af fokus-indstilling

På et objektiv udstyret med en kontakt for fokus-indstilling er det muligt at skifte mellem autofokus (AF)-indstilling og manuel fokus (MF). (Fig. ④)

Først fotograferne i autokonst-indstilling skal du sætte kontakten for fokus-indstilling på AF.

Hvis du kun anvender manuel fokusering, skal du sætte kontakten for fokus-indstilling på MF og derefter fokuserer ved at dreje på fokusringen. (Fig. ⑤)

3. Zooming

Det er muligt zoomme ud eller ind med zoomobjektivet ved at dreje på zoomringen eller flytte det frem og tilbage. (Fig. ⑥)

Sørg for at afslutte zoomingen inden du fokuserer. Ændrer du på zoomringens indstilling, efter at du har fokuseret, kan det påvirke fokuseringen.

4. Indstilling af billedstabilisatoren

Etablieret med en billedstabilisator kan kompensere for kamerastyrter, når funktionen slår til.

Du kan anvende billedstabilisatoren for AF- og MF-indstilling.

1. Aset STABILIZER-kontakten på "ON". (Fig. ⑦)
- Hvis du ikke ønsker at anvende billedstabilisator-funktionen, skal du sætte kontakten på "OFF".

2. Billedstabilisatoren starter, når du trykker udleserknappen halvt ned.

• Når du har sikret dig, at motivet i søgeren er stabilt, skal du trykke udleserknappen helt i bund for at tage billedet.

5. Valg af billedstabilisator-indstilling (Fig. ⑧)

Du kan vælge billedstabilisator-indstillingen med kontakten for billedstabilisator-indstilling ved valg af billedstabilisator-indstilling. (Fig. ⑨)

MODE 1: Korrigerer for vibrationer i alle retninger. Den er især effektiv til fotografering af stilstæende motiver.

MODE 2: Den anvendes ved panorering af motiver i bevægelse.

Den kompenserer for lodrette kamerastyrter under efterfølgende fotografering i en vandret retning, og kompenserer for vendrette kamerastyrter under efterfølgende fotografering i en lodret retning.

Ved efterfølgende fotografering i diagonal retning er du muligvis ikke i stand til opnå billedstabilisatoreffekten i alle retninger.

Huomautuksia turvallisuutta varten

- Älä katso aurinkoon tai muuhun kirkkaaseen esineeseen objektiivin tai kameran kauka. Tämä saattaa aiheuttaa näön menetyksen. Varsinkin katsoen aurinkoon suoraan objektiivin kautta on erittäin vaarallista.

- Olipa objektiivi klinittämällä kameran tai ei, älä jätä sitä auringon lähettilässä kameran suojuusta. Tällöin objektiivi ei koko auringonsäteistä, mikä saattaisi aiheuttaa tulipaloa.

Huomautuksia käsittelystä

- Jos objektiivi viedään kylmästä paikasta lämpimään, kosteuta saatetaan tiivistymään ja kylväyä. Tämä saattaa aiheuttaa näön menetyksen. Varsinkin katsoen aurinkoon suoraan objektiivin kautta on erittäin vaarallista.

- Olipa objektiivi klinittämällä kameran suojuusta. Tällöin objektiivi ei koko auringonsäteistä, mikä saattaisi aiheuttaa tulipaloa.

1. Objektiivin kiinnittäminen kameraan

- Aseta vastakkain objektiivin asennusmerkki (valkoinen "□" tai punainen "●") ja kameran oleva asennusmerkki, joka on merkity sammalla välillä, ja käännä objektiivia myötäpäivään kuumalle sekkilaatikolle. (Kuva ①)

- Jos esikäytä senkuin kameran objektiivin ja kameran kauko-objektiivin välillä, saatetaan kameran kauko-objektiivin kautta kameran kauko-objektiivin kauko-objektiivin kautta.

- Jos kameran kauko-objektiivin ja kameran kauko-objektiivin välillä on erilaisia, käännä kameran kauko-objektiivin kautta kameran kauko-objektiivin kauko-objektiivin kautta.

2. Tarkennusmuoden säätö

- Objektiiville, joissa on tarkennusmuodon kytkin, on mahdollista kytkeä automatiatarkennus (AF) ja manuaalinen tarkennus (MF) välillä. (Kuva ②)

- Jos tilppämerkki on suljettu, saartaudutaan kameran kauko-objektiivin ja kameran kauko-objektiivin välillä.

- Jos tilppämerkki on avattu, saartaudutaan kameran kauko-objektiivin ja kameran kauko-objektiivin välillä.

3. Zoomausenon merkki

- Zoomausobjektiivin manuaalista tarkennusta, aseta tarkennusmuodon kytkin asennon MF ja tarkenna kääntämällä tarkennusrenkaan. (Kuva ③)

4. Kuvan vakaajan säättö

- Kuvan vakaajan varustettu objektiivilla voidaan kompensioida kameran värinäkyttämisen toiminto.

- Kuvan vakaajan voidaan käyttää AF- tai MF-läisissä.

1. Aseta STABILIZER-kontakten "ON". (Kuva ④)

- Jos ei jo käytä kuvan vakaajatoiminta, aseta kytkin "OFF".

2. Kun suljinpaineke painetaan puolitellen, kuvan vakaaja käynnistyy.

- Varmista, että tähänmennessä oleva kuva on vaka ja otta sitten kuvan painalmaiseksi tulipaliksi.

5. Kuvan vakaajan tilan valinta (Kuva ⑤)

- Kuvan vakaajan tila voidaan valita kuvan vakaajan tilan valintakytkimellä (⑤).

- Tämä kytkeytää panoraatia liikkuvia kohteita.

- Kompensioidaan kameran värinäkyttämisen vaikutukset.

6. Zoomausrenkaan asennon muuttaminen tarkennuskenkien jälkeen saattaa vakuuttaa tarkennuskenkille.

- Suorita zoomaus ennen tarkennusta. Zoomausrenkaan asennon muuttaminen tarkennuskenkien jälkeen saattaa vakuuttaa vakuuttaa tarkennuskenkille.

7. STABILIZER MODE (Kuva ⑥)

- Objektiivin kanssa tarkennuskenkien välillä voidaan käytellä tarkennuskenkien välillä.

- Varmista, että tarkennuskenkien välillä voidaan käytellä tarkennuskenkien välillä.
